Paris, par Guillaume Anabat pour Gillet Hardouyn et Germain Hardouyn, (1500)

The illumination is perhaps due to the hand of Germain Hardouin, who was a famous Miniaturist as well as bookseller. The above edition of the Book of Hours is one of the earliest ever printed for Gillet Hardouin, and is in many respects different from the later ones. There are some curious rhyming French verses at the bottom of each month in the calendar, some of which are difficult to understand, and which, are of themselves of most unusual occurrence. They seem to be mnemotechnic for the purpose of keeping each month's proper saints in mind, but are also grotesque, as when it is said in January,

Anthoin boit le jour vin cent fois.

I have no reference to any other copy of this edition.

True Declaration of the estate of Colonie in VIRGINIA, with a confutation of such scandalous reports as have tended to the disgrace of so worthy an enterprise, published by advise and direction of the Council of Virginia, sm. 4to. *red morocco, by Bedford, £25.* 1610

EXCESSIVELY rare. It is interesting as containing an account of the doings of the colonists, their internal conditions, and relations with the Indian Kings, especially Powhatan. It is also perhaps the first printed English work concerning the Bermudas, and the mention of those Islands is strongly reminiscent of Shakspeare's Tempest. "These Islands of the Bermudas have ever been accounted as an enchanted pile of rockes, and a desert inhabitation for Divels, but all the fairies of the rocks were but flocks of birds, and the Divels that haunted the woods were but heards of swine." And again the author alludes to the "wondrous preservation of those principal persons which fell upon the Bermudas" The writer of this piece had evidently returned from Virginia not long before the date of his book.

HARIOT (T.) Briefe and True Report of the Newfoundland of Virginia, folio, *plates by Th. De Bry, facsimile reprint of the Edition of 1590, half morocco, £3. 3s* n. d.

De Bry's edition is of extreme rarity and now worth two hundred guineas; the still scarcer original of HARIOT's 1 small volume, 4to. London, 1598, passed recently through my hands, and is now in the library of a well known great London collector.

This is the only volume De Bry issued in English.

Privately printed, Exeter, (about 1785) The second copy known. There is an American reprint of this interesting Journal, executed in 1844 at New York, from the only copy then known to be in existence, which

had recently turned up. It is an extremely important narrative by the colonel of a partizan corps which performed some of the roughest and most successful service effected by the British army during the War of Independence. As a book of military instruction it is still highly valuable.

frontispiece and 45 double maps, a few of them
by Jansson, all carefully COLOURED, with
beautifully illuminated Coats of Arms, etc.
vellum, calf back, £10. Amst. 1661

A very valuable work, unmentioned by Asher in his ex-
cellent Bibliography of the Atlases and Maps relating to the
New Netherlands, although its North American charts are
different from all the Atlases and Charts examined by
Asher. It is unquestionably the best Atlas representing the
coasts of the now United States yet published to that time,
and proves that the Brothers Van Loon were accurate and
painstaking geographers. Some of the maps are naturally
reproductions from the great Atlases of Blaeu, Laet, and
Jansson, and the name of the latter appears occasionally,
but the differences which make the book important are to
be found in the delineations of regions which were daily
becoming better known, such as the European colonies in
North America. This Atlas seems to be the original, or
earliest existing form of a series of Dutch maps mentioned
by Asher, to which belongs even the Chartbook of Pieter
Goos. His statement that Goos's maps were different
from and superior to all anterior works of the kind, suffices
to fix the value of the Atlas of Van Loon.

Goos (Peter) Sea Atlas, or the Watter-World,
wherein is described all the Sea-Coasts of the
knowne World, folio, 40 maps folded and
coloured, with a short English text, hf. calf,
£3. 16s Amsterdam, 1670

This is a rare and according to Asher a very important
set of Charts, so far as the geography of Anglo-America is
concerned. However, the chief map of those territories is
identical with the corresponding plate in Van Loon's Atlas,
although indeed the two plates which give a general repre-
sentation of Western America are not the same.

DONCKER'S (Hendrick) SEA ATLAS: Pascaerten,
a collection of 26 large maps, coloured, six of
which relate specially to America, each 26
inches by 22½, the inscriptions in Dutch, some-
times Dutch and English, but with a short
Spanish text prefixed, vellum, from the library
of the Marquis of Astorga, £10. 1671-74

An Atlas of the highest importance for the history of
American Cartography; and yet to all appearance totally
unknown. Not only are the maps different from all those
mentioned in Asher's series (34 in number), but in several
instances they contain the first mention of towns that are
now flourishing. Doncker had already engraved the Atlas
which bears the name of Goos as publisher, but the above
volume is quite a different work, and of far greater interest.
Amongst the names of towns which appear here for the
first time in printed maps, are Salem in Massachusetts, and
Warwick and Providence in Rhode Island. But many other
entries will be similarly found to show the character of these
maps as documents of prime importance. The absence of
this atlas from the printed lists of Americana that I have
been able to consult, and especially from the essay of Mr.
Asher, prove not merely that an exhaustive work on the
early maps of New Netherland has yet to be written, but
also the great rarity of the volume.

- This curious and useful book contains nearly 1000 copper-plate engravings of Towns, and woodcuts of Costumes after Vecellio and others. Copies have sold for as much as £8. The value of the work has not been sufficiently recognized; it is a geographical vocabulary alphabetically arranged, and to every article there is appended a list of all the writers who have treated of it, specially or incidentally. But besides the names of places, there are also antiquarian headings in the alphabet, such as "Balnea," "Basilicae," and numerous others, each of which is accompanied by a list of authors on the subject, with the sizes, dates, and number of editions. Thus this great compilation forms an historical, geographical, and antiquarian Cyclopaedia. Two indexes are prefixed, the first containing the names of between twelve and thirteen thousand writers, the second a table of matters.

EDWARDS' (George) Natural History of uncommon Birds, and of some other rare and undescribed Animals, Quadrupeds, Reptiles, Fishes, Insects, &c. “Edwards was remarkably exact in his descriptions, and sufficiently so in his figures, so that no zoological library, especially one for reference, should be without his volumes. His works are assuredly the most valuable, on general Ornithology, that have ever appeared in England.”

Swainson.

Original copies like the above, have the numbers in the Gleanings inserted in red ink by Edwards himself.

ELLIOT (D. G.) The new and heretofore unfigured species of the Birds of North America, 1869, 2 vols. impl. folio, 72 magnificently coloured plates, (subscription price £31. 10s), ready for binding, £28. New York, 1869

Of these magnificent works only a small number were published by subscription and must soon become very rare. Uniform with the works of Gould, they vie with them for accuracy of drawing, and brilliancy of colour: the plates of the Birds of America and the Tetraonidæ are drawn by the Author, and those of the Phasianidæ by the celebrated Wolf and J. Smit. The above copies are from the Library of the late M. Jules Verreaux, the distinguished French Ornithologist.

| Vinet. BIBLIOGRAPHIE Méthodique et Raisonnée des BEAUX-ARTS, Esthétique et Histoire de l'Art, Archéologie, Architecture, Sculpture, Peinture, Gravure, Arts Industriels, etc. etc. accompagnée de Table Alphabétiques et Analytiques, par ERNEST VINET, Bibliothécaire de l'École Nationale des Beaux-Arts, complete in 4 parts, 8vo. at 5s each; also on LARGE PAPER, royal 8vo. at 10s each part | Paris, 1874 |
- Cette Bibliographie systématique, si vivement souhaitée, n'a pas de précédents. Les livres d'art se comptent par milliers, le nombre s'en accroît chaque jour, et le développement des études de cet ordre est très considérable: dès lors un guide devenait indispensable, et ce guide n'était autre

qu'une biographie méthodique et raisonnée des beaux-arts.

L'Auteur a partagé les arts en deux grandes sections: ÉTUDES GÉNÉRALES, ÉTUDES SPÉCIALES.

Les ÉTUDES GÉNÉRALES embrassent la Philosophie et la Théorie de l'art; les Rapports de l'art avec les religions, la société, les lettres et les sciences; l'Histoire générale de l'art, les matériaux pour cette même histoire, c'est-à-dire l'Archéologie et la Géographie d'art, la Biographie universelle des artistes, etc.

Les ÉTUDES SPÉCIALES ont trait au Dessin proprement dit et aux arts dont il est la base fondamentale (l'Architecture, la Sculpture, la Peinture, la Gravure, la Lithographie); elles embrassent de même les arts industriels (l'Ameublement, la Menuiserie d'art, la Céramique, la Ciselure, l'Orfèvrerie, etc.)—un point de vue technique, historique et descriptif.
